Your prescription drug co-payments at a glance

If you need a long-term medication, you may pay less over time by using the Express Scripts Pharmacy® mail-order service instead of a retail pharmacy. We'll deliver up to a 90-day supply right to you—and standard shipping is free. Ask your doctor if a 90-day prescription would be right for you. Complete the mail-order form in your welcome packet or ask your doctor to fax your prescription to Express Scripts by calling 1-888-327-9791 for faxing instructions. If you are currently using mail-order through another prescription drug program, you will need to obtain a new prescription to send with your mail order form to the Express Scripts Pharmacy. For more information about your benefit, log in to www.Express-Scripts.com and select "Benefit highlights" from the left-hand menu.

Maximum Out of pocket \$4,250 for single coverage and \$7,900 for family coverage (the family maximum would also apply to the employee + spouse/domestic partner, and employee + child(ren) coverage levels.)

For short-term prescriptions, such as antibiotics, use a participating retail pharmacy

As an Express Scripts member, you can go to any of nearly 60,000 retail pharmacies, including most major drugstores. Just ask your retail pharmacy if it's in the Express Scripts network. You can also log in to www.Express-Scripts.com and click "Locate a pharmacy" or call Member Services toll-free at 1-877-795-2926.

Express Scripts may contact your doctor about your prescription

If you are prescribed a drug that is not on your health plan's preferred list, yet an alternative plan-preferred drug exists, we may contact your doctor to ask whether that drug would be appropriate for you. If your doctor agrees to use a plan-preferred drug, you will usually pay less.

My Rx Choices®: An easy way to lower your out-of-pocket prescription costs

Your benefit includes the My Rx Choices prescription savings program, which is designed to help you find potential savings on prescription medications that you or your covered family members take on an ongoing basis.

Your doctor knows which medications are right for you but may not know their cost. My Rx Choices provides you with available lower-cost options so that you and your doctor can make the most informed decisions based on health and cost. No prescription is ever changed without your doctor's approval.

Generic drug advantage

FDA-approved generic drugs may have unfamiliar names, but they are safe and effective. Be assured that generic drugs and their brand-name counterparts:

- Have the same active ingredients
- Are manufactured according to the same strict federal regulations

Generic drugs may differ in color, size, or shape, but the U.S. Food and Drug Administration requires that the active ingredients have the same strength, purity, and quality as the brand-name alternatives.

Prescriptions filled with generic drugs often have a lower co-payment. Therefore, you may be able to get the same health benefits at a lower cost. You should ask your doctor or pharmacist whether a generic drug would be right for you. You may be able to receive the same high-quality medication but reduce your expenses.
