1 Coinsurance is a percentage of a medication’s cost.

Additional Information

- **Preventive medications**: Certain prescriptions are covered at 100%. Some of the medications covered include insulin for diabetes, Lipitor® to lower cholesterol, and lisinopril to lower blood pressure. To find out if your medication is considered a preventive medication, you can go to the open enrollment website express-scripts.com/inteloe and select Connected Care of AZ, then choose which plan you have interest in and select “Compare prescription medication costs.” Enter your medication(s), and if the medication price is $0, that medication is considered preventive.

(over, please)
• **Intel Maintenance Medication Program, with additional retail options**: Intel employees and covered dependents can order up to a 90-day supply at Walgreens\(^2\) and Costco pharmacies, as well as Express Scripts\(^\circledR\) Pharmacy home delivery service. Your copay/coinsurance for your 90-day supply will be the same whether you fill your prescriptions through Express Scripts\(^\circledR\) Pharmacy, Walgreens or Costco network pharmacies. Present your combined medical ID card whenever you purchase covered prescriptions at a participating retail pharmacy, including Costco and Walgreens.

You can purchase a 34-day supply at other participating pharmacies.

• **Specialty medications (not including fertility)**: Specialty medications are used to treat complex conditions, such as cancer, growth hormone deficiency, hemophilia, hepatitis C, immune deficiency, multiple sclerosis and rheumatoid arthritis. These medications should be ordered through Accredo, an Express Scripts specialty pharmacy, starting with the first fill to avoid higher costs. If you use a pharmacy other than Accredo to purchase specialty medications, you will be responsible for their full cost. To speak with someone at Accredo, please dial 800.803.2523, Monday through Friday, 8 a.m. to 8 p.m. Eastern Time.

• **Fertility medications**: There is $20,000 lifetime maximum amount that your plan will pay toward these medications. Your coinsurance will apply to your deductible and out-of-pocket if you are in the HDHP. After you have reached your $20,000 maximum, Intel will not pay any additional dollars for infertility medications. Additionally, once the maximum is met, any dollars spent on infertility medications will not be applied to your deductible or out-of-pocket maximum.

Fertility medications can be filled at a participating retail pharmacy or Freedom Fertility (800.660.4283).

• **Coverage approval**: Certain medications may require a coverage review to determine whether they meet the plan’s coverage requirements. To see whether a medication you take requires review and approval, you can check the enrollment site below or contact Member Services. If you’re an existing member, you can log in at express-scripts.com for this information.

• **Brands with generic equivalents**: If you choose to purchase a brand medication when a generic equivalent is available, you’ll pay the generic coinsurance plus the cost difference between the brand and the generic medications. The difference won’t apply to your deductible (if applicable) or out-of-pocket maximum.

• **Out-of-network claims**: If you obtain a covered prescription at a pharmacy that is not in the network, you will be responsible for a 40% coinsurance.

• **Compound medications**: Most compound medications are excluded.

---

**For questions**

Answers to commonly asked questions can be found on the [express-scripts.com/inteloe](http://express-scripts.com/inteloe) website.

You can sign into your Express Scripts account from connectedcarehealth.com. You can then follow the links to the prescription medication benefit, without having to log in separately.

\(^2\) This includes Duane Reade™ pharmacies and any other Walgreens-affiliated pharmacies and all are included in the Maintenance Medication Program network.
