

## Questions & Answers about **Smart90®**

### **1. What is Smart90?**

It's a feature of your prescription plan, managed by Express Scripts. With it, you have two ways to get up to a 90-day supply of your long-term medications (those medications you take regularly for ongoing conditions). You can conveniently fill those prescriptions either through home delivery from Express Scripts® Pharmacy or at a retail pharmacy in the Smart90 network. Costco, Rite Aid and Sharp Rees-Stealy pharmacies participate in your plan's Smart90 network.

### **2. How many retail pharmacies are available to me?**

There are more than 5,000 retail pharmacies in your plan's Smart90 network. Costco, Rite Aid and Sharp Rees-Stealy pharmacies participate in your plan's Smart90 network. To locate one, log in at [express-scripts.com](http://express-scripts.com) and click **Find a Pharmacy** in the menu under **Prescriptions**. Smart90 network pharmacies will be noted in your search results. Or call Express Scripts at 800.918.8011.

### **3. What is the advantage of getting up to a 90-day supply vs. up to a 30-day supply?**

By getting up to a 90-day supply of your long-term medication, you'll make fewer trips to the pharmacy, and you'll only need to make one payment every three months. Also, there's usually a savings for getting one 90-day supply vs. three 30-day supplies at retail. You will pay the same copayment for your 90-day supply whether you fill through home delivery from Express Scripts® Pharmacy or at a Smart90 network pharmacy.

### **4. How do I get started with Smart90?**

You can review your 90-day options by visiting [express-scripts.com](http://express-scripts.com) or calling Express Scripts at 800.918.8011. If you are a first-time visitor to [express-scripts.com](http://express-scripts.com), take a minute to register (be sure you have your member ID number handy).

### **5. Do I need to get a new prescription from my doctor to get up to a 90-day supply?**

If you choose to get up to a 90-day supply of your long-term medication through home delivery from Express Scripts® Pharmacy, we can contact your doctor to get a new prescription. If you choose to get up to a 90-day supply at a Smart90 network pharmacy, you'll need to get a new prescription from your doctor.

## **6. What is the difference between long-term and short-term medications?**

Long-term medications, also called maintenance medications, are those you take on an ongoing basis, such as to treat high blood pressure or high cholesterol. Short-term medications include antibiotics and other medications that you take for short periods of time. Under your plan, you can fill short-term prescriptions at any participating retail pharmacy in your network.

## **7. I already use home delivery from Express Scripts® Pharmacy to get my long-term medications. Do I need to change anything?**

No. If you're using home delivery from Express Scripts® Pharmacy for your long-term medications, you may already be saving money under your plan. Congratulations! You don't need to do a thing.
