

2015 Preventive Drug List For Pitney Bowes PPO and Health Fund PPO Options

In both of these PPO options, you are required to pay only 10% coinsurance for preventive prescription drugs. Please note that not every dosage form of a listed drug is considered preventive, so please check with Express Scripts if you have questions. This list indicates if there are quantity limits on the medication or if step therapy applies.

Always tell your doctor you want generic prescriptions instead of brand names; they're less expensive and available to treat a variety of conditions. To determine which of your medications may be available generically, please visit Express-Scripts.com or call Member Services at 1-866-397-5550.
