## Preventive medications list

In a high-deductible health plan like Boeing's Advantage + health plan, federal rules permit certain preventive drugs to be paid without being subject to the plan's deductible.

For drugs on the preventive drug list, you pay only the generic, brand formulary, or brand non-formulary coinsurance percentage described in your plan summary.

This list is periodically reviewed and updated to ensure that the drugs listed meet the criteria for inclusion. Because this list is subject to change, please log in to [www.express-scripts.com/boeing](http://www.express-scripts.com/boeing) to check the status of the medications you take.

*Medications must be covered by your plan to be eligible for the preventive medication program.*
