

PAY LESS FOR SELECT SPECIALTY MEDICATIONS

With enrollment in copay assistance and monitoring of prescription refills

Specialty medications can cost a lot of money. That's why your plan offers a copay assistance benefit administered by SaveOnSP, which can help you lower your out-of-pocket costs to \$0.

Let SaveOnSP help you save money.

Over 350 specialty medications are eligible for this plan benefit.¹ If you're filling an eligible medication, a representative from SaveOnSP will contact you to support your enrollment in copay assistance and arrange for the monitoring of prescription refills.

You pay \$0 for your medication when you participate in the plan benefit by enrolling in copay assistance and allowing us to monitor your refills, so we can ensure you continue to receive this benefit. If you choose not to participate in the plan benefit, you'll pay a higher cost share when you fill your medication.

Conditions covered by manufacturer copay assistance programs include, but are not limited to:

- Hepatitis C
- Multiple Sclerosis
- Psoriasis
- Inflammatory Bowel Disease
- Rheumatoid Arthritis
- Cancer

Here's an example of how it works.²

John is taking a specialty medication that's eligible for the copay assistance benefit. His copay is 30% of the cost of the medication, which is \$1,150. SaveOnSP can reduce his cost.

- **When John participates in the plan benefits, he will pay \$0 out of pocket.** He will work with SaveOnSP to enroll with the applicable manufacturer copay assistance program, and he'll consent to SaveOnSP monitoring of prescription refills.
- **If John decides not to participate in the plan benefit, in this case his cost share will be \$1,150 out of pocket.** In this case, John's cost share wouldn't count toward his deductible or out-of-pocket maximum.
